

Sprint 6 Documentation – Elastic Search, Users (Special Use Case)

Team: Sebastian and Felix

Repository: <https://github.com/BunnySupreme/SWEN3Project>

Sprint duration: 12.12.2025 – 08.01.2026

Estimated workload: 6 h / person / week

1. Sprint Goal (from assignment)

1. Introduce text search using Elasticsearch
2. Index document properties which ought to be searchable
3. Make search available in the frontend
4. Implement special use case: Users
 - a. Only users may upload
 - b. Only users may search
 - c. Users may only see documents they themselves have uploaded (whether via the overview or search)

2. Implemented Work

ElasticSearch

1. Added paperless-elasticsearch service to docker-compose.yml
2. Added DocumentSearchModel which is used for interaction with the ElasticSearch DB. Functionally identical to DocumentModel, but thus decoupled from Postgres DB
3. Implemented indexing pipeline:
 - a. On OCR Completion: Index {Id, Title, Summary, OcrText, Tags}
 - b. On Document Update or Deletion: Remove relevant index
4. Implemented search endpoint:
 - a. GET /api/documents/search?q=...
5. Added integration test steps / manual test procedure
6. Search returns documents by title/summary/OCR text
7. Search is available to logged-in users via the frontend, searches documents uploaded by logged-in user

Special Use Case: Users

1. Implemented backend infrastructure for storing users
 - a. New user model was created and added to DB migration

- b. Document model was updated so it links to users via foreign key relation
- 2. Implemented User Creation
 - a. Website visitors may now create a new user
- 3. Implemented User Authentication
 - a. Once they have created a new user, visitors may log into this user account
 - b. Upon login, upload and search functions are available to them (but not before)
 - c. Only documents they themselves have uploaded are visible to users
 - d. Frontend and backend received extensive updates to facilitate this authentication

3. Workload (Estimate)

Team Member	Week / Sprint	Estimated Hours	Main Tasks
Sebastian	Sprint 6	24	Elastic Indexing, Elastic Search, Documentation
Felix	Sprint 6	24	User Creation, User Authentication, Documentation
